

## Research Request Posttraumatic Stress

I am William Feck, a doctoral candidate at Trevecca Nazarene University in the Ph.D. in Clinical Counseling program and a licensed professional counselor and mental health service provider (LPC/MHSP). Under the university supervision of Dr. John F. Kennedy, I am conducting a study regarding posttraumatic stress. This study aims to analyze **combat exposure, relationships, beliefs, and posttraumatic stress**. This information will be useful for the professional counseling field with the potential for it to inform PTSD treatment. For this study, you are invited to participate in an online survey if you meet the requirements below.

### **About the study:**

- An online survey (15-20 minutes)
- Your identity will remain confidential
- You can withdraw at any time
- This study has been approved by Trevecca Nazarene University IRB

### **Participants must meet these requirements:**

- Be 18 years or older
- Be a U.S. citizen
- Have served in the military
- Have been deployed or experienced combat exposure

I appreciate your willingness to consider contributing to research in the area of PTSD. Coming from a military family myself and working with veterans with PTSD, I hope to contribute to effective PTSD treatment considerations.

### **If you are willing to participate,**
