The Clinician's Compass has been approved by NBCC as an Approved Continuing Education Provider, ACEP No. 8058. Programs that do not qualify for NBCC credit are clearly identified. The Clinician's Compass is solely responsible for all aspects of the programs.

ASSESSING AND MANAGING SUICIDE RISK: A CORE COMPETENCY TRAINING FOR MENTAL HEALTH PROFESSIONALS

Live- In Person
Saturday August 29, 9am-12pm
Berry Farms Hampton Inn, Franklin, TN

LEARNING OBJECTIVES

Upon completion, participants will be able to:

1. Recognize and manage personal attitudes and emotional reactions that influence clinical work with suicidal clients, and maintain a collaborative stance throughout the assessment and intervention process.
2. Describe prevailing theoretical models of suicidal behavior and apply them to identify evidence-based, culturally informed risk factors, protective factors, and warning signs.
3. Conduct a structured suicide risk assessment interview, integrate findings into a clinical risk formulation, and collaboratively develop a safety plan.
4. Apply evidence-based interventions for suicidality and document risk assessment, clinical reasoning, and treatment decisions according to professional standards.
5. Navigate legal and ethical obligations related to suicide risk and engage in structured debriefing and self-care practices following work with suicidal clients.

ABOUT THE INSTRUCTOR Alice Bernet, PhD, PMHNP-BC, NBC-HWC

- Board-certified psychiatric nurse practitioner and educator with 20+ years of clinical experience.
- Published researcher and passionate advocate for suicide prevention and clinical tools.
- Focuses on equipping professionals with relational, collaborative, and evidence-based skills.
- Known for making complex psychiatric concepts relatable and engaging in workshops.

Favorite teaching moment: seeing a connection made by a patient or student. Outside of clinic, enjoys indoor rowing and time with her daughter.

Cost: \$125
